

Cause No. # 3:14CV595-  
HTW-LRA

DEAR MS. ANDERSON (Hon. Judge)

3-23-2015

This letter is being directed to your office containing certain information regarding what I intend to prove in trial. This is to give you a better understanding of what I was trying to explain on March 16, 2015, at the Omnibus hearing.

Now, it's the duty of the state and county to protect me. I have the right to be free from assault. The law recognizes that, in general, people have the duty to not injure one another. When someone breaks that duty, that breach is called a "tort".

In this case, there was a breach of duty to protect while on administrative lockdown.

Deputy Jonathan Brister exercised deliberate indifference to my health and safety by failing to protect me from an institutional attack while he was present on the Pod at the time the assault/attack occurred. Whether Deputy Brister was the one saying "open cell 5502" is unknown, but what is known and can be proven is that he authorized for my cell door to be opened because it was opened by Pod control, and not by the alternative Rod that opens the door from the ZONE. Therefore, the 3 inmates did not open my cell doors themselves.

Also, in this case, there was an act of negligent tort performed. Deputy Brister exercised deliberate indifference to my health and safety by failing "immediately" to protect me from the attack by 3 unidentified inmates as soon as he knew it was occurring, nor did he request

for back up, or, report it transpired.  
 Moreover, as a result of the deliberate  
 indifference exercised by the aforementioned  
 defendant, I suffered serious harm at the  
hands of 3 inmates. I sustained multiple  
physical injuries; a broken/fractured jaw  
and nose, that required surgery.

I also suffered extreme emotional distress of  
 embarrassment from incident.

It is evident that deputy Brister exercised  
 Negligence and Breach of Duty to protect  
 me during, "ADMINISTRATIVE LOCKDOWN"  
 where there should be no inmate moving  
 unless AUTHORIZED OR ESCORTED IN RESTRAINTS  
by Officials, especially the Housing deputy, as well  
 as any cell doors open only by them, as well.

The inmates gained entry into my cell by  
 my cell door opening after someone said  
 open cell 5502. Deputy Brister was standing  
 outside my cell between my cell, ~~LC~~ 5502  
 and cell 5501, he was seen by witnesses.

When my cell door opened and the inmates  
 entered and attacked me. I seen him  
 leaving out the zone when I made it to my  
 door and looked out after the assault.

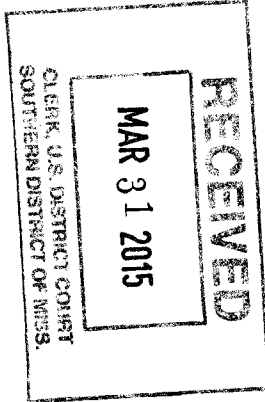

Therefore, I should be awarded compensatory  
 and punitive damages for the physical and  
 emotional injuries sustained as a result of this  
 plaintiff's beating/assault. Or any other relief  
 that you may deem just and appropriate.  
 Your Honor, I pray that you consider the facts  
 that I have presented to you and conclude  
 in plaintiff's favor. Thank you and God Bless!

Respectfully Submitted  
 Plaintiff: LeZony G. Carter

I informed you that after seeing the Warden pertaining to the grievance that I had filed relating to the assault and conduct of this deputy. I was released several days later. However, this release was not authorized by the Warden. I was released through a medical release due to my condition and minor reason I was incarcerated. I have all records to show that the judge signed off on a medical release. Thank you in advance for your consideration in this most sensitive matter.

Respectfully Submitted  
DeJong J. Carter
